Handbook of Bioenergy Crop Plants

Handbook of Bioenergy Crop Plants

As the world's population is projected to reach 10 billion or more by 2100, devastating fossil fuel shortages loom in the future unless more renewable alternatives to energy are developed. Bioenergy, in the form of cellulosic biomass, starch, sugar, and oils from crop plants, has emerged as one of the cheaper, cleaner, and environmentally sustainable alternatives to traditional forms of energy. **Handbook of Bioenergy Crop Plants** brings together the work of a panel of global experts who survey the possibilities and challenges involved in biofuel production in the twenty-first century.

Section One explores the genetic improvement of bioenergy crops, ecological issues and biodiversity, feedstock logistics and enzymatic cell wall degradation to produce biofuels, and process technologies of liquid transportation fuels production. It also reviews international standards for fuel quality, unique issues of biofuel-powered engines, life-cycle environmental impacts of biofuels compared with fossil fuels, and social concerns.

Section Two examines commercialized bioenergy crops, including cassava, *Jatropha*, forest trees, maize, oil palm, oilseed *Brassicacae*, sorghum, soybean, sugarcane, and switchgrass.

Section Three profiles emerging crops such as *Brachypodium*, diesel trees, minor oilseeds, lower plants, *Paulownia*, shrub willow, sugarbeet, sunflower, and sweet potato. It also discusses unconventional biomass resources such as vegetable oils, organic waste, and municipal sludge.

Highlighting the special requirements, major achievements, and unresolved concerns in bioenergy production from crop plants, the book is destined to lead to future discoveries related to the use of plants for bioenergy production. It will assist in developing innovative ways of ameliorating energy problems on the horizon.

From reader reviews:

Rocio Linville:

Hey guys, do you really want to find a new book to learn? Maybe the book with the name Handbook of Bioenergy Crop Plants suitable to you? The actual book was written by a popular writer in this era. The book entitled Handbook of Bioenergy Crop Plants is a single of several books that everyone reads now. This specific book has inspired many people in the world. When you read this guide you will enter the new dimension that you never know ahead of. The author explained their strategy in a simple way, consequently all of people can easily comprehend the core of this guide. This book will give you a lot of information about this world now. So that you can see the representation of the world with this book.

Melvin Lucero:

The reserve entitled Handbook of Bioenergy Crop Plants is the guide that recommended to you to learn. You can see the quality of the guide content that will be shown to a person. The language that the creator uses to explain their ideas are easy to understand. The copy writer did a lot of investigation when writing the book, hence the information that they share to you is absolutely accurate. You also could possibly get the e-book of Handbook of Bioenergy Crop Plants from the publisher to make you considerably more enjoy free time.

John Wilson:

As a student, I exactly feel bored to be able to read. If their teacher inquired them to go to the library in order to make a summary for some book, they are complained. Just minor students that have reading's heart and soul or read their hobby. They just do what the trainer wants, like asked to go to the library. They go to at this time there but nothing reading significantly. Any students feel that reading through is not important, boring as well as can't see colorful photos on there. Yeah, it is to become complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this Handbook of Bioenergy Crop Plants can make you feel more interested to read.

Harold Esparza:

Reading a book makes you to get more knowledge from it. You can take knowledge and information coming from a book. Book is published or printed or created from each source that filled update of news. With this modern era like at this point, many ways to get information are available for anyone. From media social including newspaper, magazines, science e-book, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Ready to spend your spare time to open your book? Or just searching for the Handbook of Bioenergy Crop Plants when you essential it?
