## Reason in the City of Difference (Questioning Cities) Gary Bridge

In the modernist city rationality ruled and subsumed difference in a logic of identity. In the postmodern city, reason is abandoned for an endless play of difference. *Reason in the City of Difference* poses an alternative to these extremes by drawing on classical American philosophical pragmatism (and its contemporary developments in feminism and the philosophy of communication) to explore the possibilities of a strengthening and deepening of reason in the contemporary city. This is a transactional rationality based on communication, rather than cognition, involving bodies as much as minds, and non-discursive, as well as discursive competences. It is a rationality that emerges out of difference and from within the city, rather than over and above it.

Using pragmatist philosophy and a range of suggestive examples of urban scholarship, this fascinating book offers a new, alternative reading of the city.
