Firefly Planisphere: Latitude 42 Degrees North Robin Scagell

A valuable tool for both beginners and advanced stargazers, updated for use to 2022.

Astronomy Forum called the **Firefly Planisphere** "a work of art [that] no amateur astronomer should be without." Charted by the month, day, hour and minute, it is quick, battery-free and weather-resistant. The stargazer needs only to turn the planisphere to align the current date and time. What the see-through panel reveals will match the view of the night sky.

This edition of the **Firefly Planisphere** is updated for use to 2022. It shows the position of the stars for every night of the year. Icons that describe star magnitudes -- the larger the symbol, the brighter the star -- make it easy to locate specific stars. Stargazers will be able to locate planets, stars, constellations, globular clusters, nebulas, galaxies and other celestial wonders.

Other features include:

- At-a-glance coordinates for locating the brightest objects in the sky
- Planetary tables to locate Venus, Mars, Jupiter and Saturn
- Times of sunrise and sunset for each day
- Declination and right ascension scales
- The ecliptic path.

The booklet provides accurate information on bright and faint stars, the Milky Way and deep-sky searching. Other topics include:

- Using the planisphere
- Finding planets, sunrise and sunset
- How to read a star map
- Learning the sky
- Exploring the skies, season by season.

With its sturdy construction, smooth wheel rotation, easy-to-read booklet and protective pocket, the Firefly Planisphere is simply the handiest guide to the night sky for the amateur astronomer.
