Puzzlebook: Amusements in Mathematics (430 puzzles for quizzes) Annotated the author's bibliography Henry Ernest Dudeney

Henry Ernest Dudeney wrote of the psychology of puzzles. He wrote that we spend a great deal of our lives solving puzzles. Puzzles, according to Dudeney, were nothing more than perplexing questions. He asserted that we are constantly asking questions or trying to answer questions from childhood until death.

He said that essentially we had to solve puzzles, that it was a drive, a need, a necessity of life. He believed that solving puzzles was just a matter of employing our reasoning facilities. Mental hospitals, Dudeney said, were built specifically for the "unfortunate" people who are unable to solve puzzles.

It was also what he was thinking of when he wrote the book "Amusements in Mathematics" which was chock full of amazing math puzzles ranging from the most simplistic to extremely difficult. It had logic puzzles and math brain teasers, showing readers that math is fun. What's more, nearly a century after its first publication, it is still popular and still confounding even the most astute mathematical wizard. These math puzzles by Dudeney have withstood the test of time.

This kindle edition contains 430 puzzles including the solutions. Each solution has the linkage for your easy optimization. If you love to solve the puzzles, this book is the first one that you have to try!
