**The New Book of Optical Illusions** Georg Ruschemeyer

*The New Book of Optical Illusions* is a mind-bending collection of 150 of the most significant optical phenomena, loosely grouped into 33 chapters according to particular visual effect.

An optical illusion has two elements. One is the perceived illusion, what you see. It may be merging lines, moving shapes or conflicting sizes. The other element is the scientific explanation or neuronal basis of the illusion. Here enters *The New Book of Optical Illusions*, which describes the latter--the science of an optical illusion.

Concise text describes the history of the optical illusions and their origin. Some are ancient (like a 3D Roman mosaic in a 2nd-century BC home on Malta) and others are modern (like emoticons and street art). There are rarely seen phenomena, works by great illusionists, like M.C. Escher, and well-known illusions like the Impossible Triangle and the Albert Einstein/Marilyn Monroe portrait.

Some of the illusions are:

- Seeing Things That Are Not There -- Discovered on a BBC studio wall in the 1950s, this illusion involves shadows that seem to flit up and down along columns of stripes. Apparently the number of identical lines causes the brain to lose proper focus on what it is seeing.
- Flashes from the Corner of the Eye -- The Scintillating Grid is a variation of the classic Hermann Grid first described in 1870. In this illusion, circles in an intersecting grid disappear and reappear elsewhere. It is a complex effect rooted in lateral inhibition, which increases the contrast between light and dark in the retina.

Perfect for young and adult readers and enthusiasts of optical illusions, this is a great selection for circulating collections and retail customers.

### From reader reviews:

#### **Margert Lewis:**

Do you have favorite book? In case you have, what is your favorite's book? Book is very important thing for us to understand everything in the world. Each publication has different aim or even goal; it means that guide has different type. Some people sense enjoy to spend their a chance to read a book. These are reading whatever they acquire because their hobby is reading a book. Think about the person who don't like looking at a book? Sometime, particular person feel need book when they found difficult problem or perhaps exercise. Well, probably you will require this The New Book of Optical Illusions.

#### **Janice Smith:**

Have you spare time for the day? What do you do when you have considerably more or little spare time? Yes, you can choose the suitable activity with regard to spend your time. Any person spent their very own spare time to take a walk, shopping, or went to the actual Mall. How about open as well as read a book titled The New Book of Optical Illusions? Maybe it is to get best activity for you. You know beside you can spend your time with the favorite's book, you can better than before. Do you agree with it has the opinion or you have some other opinion?

#### **Ricky Bodkin:**

This The New Book of Optical Illusions is great e-book for you because the content which can be full of information for you who have always deal with world and still have to make decision every minute. This particular book reveal it facts accurately using great organize word or we can claim no rambling sentences included. So if you are read it hurriedly you can have whole info in it. Doesn't mean it only offers you straight forward sentences but hard core information with wonderful delivering sentences. Having The New Book of Optical Illusions in your hand like obtaining the world in your arm, info in it is not ridiculous a single. We can say that no publication that offer you world throughout ten or fifteen small right but this book already do that. So , this really is good reading book. Hey Mr. and Mrs. busy do you still doubt that will?

#### **Andre Barrett:**

As a university student exactly feel bored in order to reading. If their teacher asked them to go to the library or make summary for some e-book, they are complained. Just small students that has reading's internal or real their leisure activity. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading significantly. Any students feel that reading through is not important, boring and also can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore , this The New Book of Optical Illusions can make you experience more interested to read.
