Contemporary Ergonomics and Human Factors 2011: Proceedings of the international conference on Ergonomics & Human Factors 2011, Stoke Rochford, Lincolnshire, 12-14 April 2011

The broad and developing scope of ergonomics - the application of scientific knowledge to improve people's interaction with products, systems and environments - has been illustrated for 25 years by the books which make up the *Contemporary Ergonomics* series. This book presents the proceedings of the international conference on Ergonomics & Human Factors 2011. In addition to being the leading event in the UK that features ergonomics and human factors across all sectors, this is also the annual conference of the Institute of Ergonomics & Human Factors.

Individual papers provide insight into current practice, present new research findings and form an invaluable reference source. The volumes provide a fast track for the publication of suitable papers from international contributors, with papers being subject to peer review since 2009.

A wide range of topics are covered in these proceedings, including transport, user centred design, safety culture, military, accidents, healthcare, manufacturing, human factors integration, education, the 24-hour society, sociotechnical systems and green ergonomics.

As well as being of interest to mainstream ergonomists and human factors specialists, **Contemporary Ergonomics and Human Factors** will appeal to all those who are concerned with people's interactions with their working and leisure environment including designers, manufacturing and production engineers, health and safety specialists, occupational, applied and industrial psychologists, and applied physiologists.
