Advances in Molecular Toxicology, Volume 9

Advances in Molecular Toxicology features the latest advances in the subspecialties of the broad area of molecular toxicology. This series details the study of the molecular basis of toxicology by which a vast array of agents encountered in the human environment and produced by the human body manifest themselves as toxins.

The book is not strictly limited to documenting these examples, but also covers the complex web of chemical and biological events that give rise to toxin-induced symptoms and disease. The new technologies that are being harnessed to analyze and understand these events will also be reviewed by leading workers in the field.

- Provides cutting-edge reviews by leading workers in the discipline
- Includes in-depth dissection of the molecular aspects of interest to a broad range of scientists, physicians and any student in the allied disciplines
- Presents leading-edge applications of technological innovations in chemistry, biochemistry, and molecular medicine
