BIM Content Development: Standards, Strategies, and Best Practices Robert S. Weygant

A must-have reference to create content-rich BIM objects and models

A cutting-edge technology, Building Information Modeling (BIM) software allows AEC professionals to produce data-intensive 3D building models that far exceed those rendered with the 2D limitations of CAD, today's industry standard. Unlike CAD, however, no consensus has been reached among AEC industries for agreed upon guidelines directing BIM models. To fill this void, this book explores the different approaches used in designing a BIM model and incorporates them into one cohesive strategy that serves as a digital road map going forward.

BIM Content Development:

- Details the various types of information (graphic and data) that Building Information Modeling (BIM) can gather about a building, such as its dimensions and material, its performance, its functionality, its interaction with other structures, and how often it must be maintained
- Presents a vendor-neutral approach to thinking about, organizing, and managing data used to create a 3D building model
- Covers the different methods for organizing content, such as CSI's MasterFormat®, Unifomat, OmniClass, and Industry Foundation Classes (IFC)

Providing the means and methods for effective content creation, *BIM Content Development* offers sound guidance for graphic standards and data management solutions to maximize the ability of professionals to operate on any BIM software platform—and shows how to strengthen the decision-making process to unleash powerful tools for modeling a building's informational profile.

From reader reviews:

Bonnie Abramowitz:

Book is usually written, printed, or highlighted for everything. You can know everything you want by a e-book. Book has a different type. As it is known to us that book is important matter to bring us around the world. Alongside that you can your reading ability was fluently. A publication BIM Content Development: Standards, Strategies, and Best Practices will make you to possibly be smarter. You can feel considerably more confidence if you can know about almost everything. But some of you think which open or reading a new book make you bored. It is not necessarily make you fun. Why they might be thought like that? Have you seeking best book or acceptable book with you?

Phyllis Spencer:

The reason why? Because this BIM Content Development: Standards, Strategies, and Best Practices is an unordinary book that the inside of the reserve waiting for you to snap that but latter it will surprise you with the secret the item inside. Reading this book alongside it was fantastic author who write the book in such wonderful way makes the content within easier to understand, entertaining approach but still convey the meaning totally. So , it is good for you for not hesitating having this any longer or you going to regret it. This book will give you a lot of positive aspects than the other book have got such as help improving your talent and your critical thinking technique. So , still want to hesitate having that book? If I were being you I will go to the guide store hurriedly.

Raymond Langford:

Playing with family in a very park, coming to see the ocean world or hanging out with friends is thing that usually you will have done when you have spare time, and then why you don't try thing that really opposite from that. 1 activity that make you not sense tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love BIM Content Development: Standards, Strategies, and Best Practices, you can enjoy both. It is excellent combination right, you still desire to miss it? What kind of hangout type is it? Oh occur its mind hangout men. What? Still don't get it, oh come on its called reading friends.

Darren Perez:

Reading a reserve make you to get more knowledge from it. You can take knowledge and information from the book. Book is composed or printed or created from each source which filled update of news. In this particular modern era like currently, many ways to get information are available for a person. From media social including newspaper, magazines, science publication, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just looking for the BIM Content Development: Standards, Strategies, and Best Practices when you necessary it?
