## **Forgotten Modern: California Houses 1940-1970** Alan Hess

Forgotten Modern reveals the work of the innovative architects building in California from the 1930s to the 1970s. With groundbreaking and illuminating examples that will alter the way we think of California architecture, Hess and Weintraub focus on those that exemplify early mid-century modern, variations on minimalism, and organic architecture.

Though architects, historians, and the public alike have overlooked many of these superb architects from California's past century, this book intends to bring them back to our attention. All the architects included here are important in helping to show the breadth of design, that styles like Organic were more widely represented than we have previously realized, and that the fertile soil of California design fostered a wide spectrum of remarkable ideas—even if not all developed a significant school of followers.

### Chapters Include:

- A New Introduction to Midcentury California
- Searching For Midcentury Modern
- Variations on Wood and Steel Modernism
- Organic Architecture
- History Plus Modernism
