John T. Bowen

The Economic Geography of Air Transportation: Space, Time, and the Freedom of the Sky (Routledge Studies in the Modern World Economy) John T. Bowen

Like the railroad and the automobile, the airliner has changed the very geography of the societies it serves. Fundamentally, air transportation has helped redefine the scale of human geography by dramatically reducing the cost of distance, both in terms of time and money. The result is what the author terms the 'airborne world', meaning all those places dependent upon and transformed by relatively inexpensive air transportation.

The Economic Geography of Air Transportation answers three key questions: how did air transportation develop in the century after the Wright Brothers, what does it mean to live in an airborne world, and what is the future of aviation in this century? Examples are drawn from throughout the world. In particular, ample consideration is given to the situation in developing countries, where air transportation is growing rapidly and where, to a considerable degree, the future of the airborne world will be determined.

The book weaves together the technological development of aviation, the competition among aircraft manufacturers and their stables of airliners, the deregulation and privatization of the airline industry, the articulation of air passenger and air cargo services in everyday life, and the challenges and controversies surrounding airports. It will be of particular interest to students and researchers in air transport history, the geography of the airline industry, air transport technological development, competition in the commercial aircraft industry, airport development, geography and economics. It will also be useful to professionals working in the airline, airport, and aircraft manufacturing industries.

The The Economic Geography of Air Transportation: Space, Time, and the Freedom of the Sky (Routledge Studies in the Modern World Economy) offer you a new experience in examining a book.

Mary Alejandro:

As a college student exactly feel bored to be able to reading. If their teacher requested them to go to the library or make summary for some book, they are complained. Just minor students that has reading's heart or real their pastime. They just do what the teacher want, like asked to go to the library. They go to at this time there but nothing reading significantly. Any students feel that looking at is not important, boring and also can't see colorful pics on there. Yeah, it is to be complicated. Book is very important for you. As we know

that on this era, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this The Economic Geography of Air Transportation: Space, Time, and the Freedom of the Sky (Routledge Studies in the Modern World Economy) can make you sense more interested to read.
