## **Black Hole Math** National Aeronautics and Space Administration

Teachers continue to look for ways to make math meaningful by providing students with problems and examples demonstrating its applications in everyday life. Space Mathematics offers math applications through one of the strongest motivators-Space. Technology makes it possible for students to experience the value of math, instead of just reading about it. Technology is essential to mathematics and science for such purposes as “access to outer space and other remote locations, sample collection and treatment, measurement, data collection and storage, computation, and communication of information.” Black Hole Math is designed to be used as a supplement for teaching mathematical topics. The problems can be used to enhance understanding of the mathematical concept, or as a good assessment of student mastery. This collection of activities is based on a weekly series of space science problems distributed to thousands of teachers during the 2004-2008 school years. They were intended as supplementary problems for students looking for additional challenges in the math and physical science curriculum in grades 10 through 12. The problems are designed to be ‘one-pagers’ consisting of a Student Page, and Teacher’s Answer Key. This compact form was deemed very popular by participating teachers. The topic for this collection is Black Holes, which is a very popular, and mysterious subject among students hearing about astronomy. Students have endless questions about these exciting and exotic objects as many of you may realize! Amazingly enough, many aspects of black holes can be understood by using simple algebra and pre-algebra mathematical skills. This booklet fills the gap by presenting black hole concepts in their simplest mathematical form. General Approach: The activities are organized according to progressive difficulty in mathematics. Students need to be familiar with scientific notation, and it is assumed that they can perform simple algebraic computations involving exponentiation, square-roots, and have some facility with calculators. The assumed level is that of Grade 10-12 Algebra II, although some problems can be worked by Algebra I students. Some of the issues of energy, force, space and time may be appropriate for students taking high school Physics.

### **From reader reviews:**

#### **David Crockett:**

Have you spare time for any day? What do you do when you have more or little spare time? That's why, you can choose the suitable activity intended for spend your time. Any person spent their particular spare time to take a move, shopping, or went to often the Mall. How about open or read a book eligible Black Hole Math? Maybe it is to get best activity for you. You realize beside you can spend your time using your favorite's book, you can smarter than before. Do you agree with the opinion or you have different opinion?

#### **Joseph Tucker:**

This Black Hole Math book is simply not ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book is actually information inside this e-book incredible fresh, you will get data which is getting deeper you actually read a lot of information you will get. That Black Hole Math without we comprehend teach the one who examining it become critical in pondering and analyzing. Don't always be worry Black Hole Math can bring any time you are and not make your bag space or bookshelves' turn into full because you can have it in the lovely laptop even telephone. This Black Hole Math having very good arrangement in word in addition to layout, so you will not experience uninterested in reading.

#### **Frances Smith:**

This book untitled Black Hole Math to be one of several books which best seller in this year, honestly, that is because when you read this e-book you can get a lot of benefit on it. You will easily to buy this particular book in the book store or you can order it by way of online. The publisher with this book sells the e-book too. It makes you more easily to read this book, as you can read this book in your Touch screen phone. So there is no reason for you to past this e-book from your list.

#### **Zachary Foushee:**

Are you kind of busy person, only have 10 or even 15 minute in your moment to upgrading your mind skill or thinking skill possibly analytical thinking? Then you are receiving problem with the book when compared with can satisfy your short space of time to read it because all this time you only find guide that need more time to be go through. Black Hole Math can be your answer since it can be read by you who have those short extra time problems.
