Throughout the ancient stories of humanity, plants and fungi have been used as a sources to contact divine realms by the Shaman and Priest alike. These induced experiences are often potent enough to form Mystics, Prophets, Spiritual Gurus, and even gods. Psychedelic substances in the modern age have been virtually demonized and condemned by most members of society or labeled as recreational by others - leaving any claims to a spiritual connection castrated at the thesis statement. Scholars fear tackling this subject by reality of being ostracized from peers and/or branded as a hieratic by the Church if not outright imprisoned by the state.

Holidays such as Christmas, Easter, Holy Communion, and Marriage all appear to have their roots in the experience that Christ is centered upon; Sacred Psilocybin Mushrooms. This book takes a deeper look into the myths, artwork, and stories that surround predominating religions and breaks down how each individual can come into direct communication with divine realms by instituting the true Holy Blessed Sacrament.

Reverend Nicklas B. Failla is a Cultural Anthropologist with an emphasis on religious sacrament use particularly that of P. Cubenis. Failla plans to continue research into how neurotropic and psychoactive substances have melded spirituality since the beginning of time as well, as their current importance for the future of humanity.
